

# Delivering on the Promise of Telehealth in California

October 22, 2020

Kim Klupenger, President, CTN  
Chief Experience Officer, OCHIN

**California  
Telehealth  
Network**

*An OCHIN organization*

# Who We Are

*An OCHIN organization*

- CTN has promoted and fostered the provisioning of broadband access and telehealth adoption for healthcare providers across the state leveraging FCC and State funding for over 10 years. CTN became a subsidiary of OCHIN\* 3.5 years ago in order to merge the missions that access to healthcare for all with broadband access being foundational.
- CTN is an awardee of HRSA Telehealth Resource Grant (CTRC receives \$325k annually) funding tasked with supporting telehealth program adoption.
  - *\*OCHIN is a national, non-profit health information and innovation organization serving the most fragile and underserved populations.*

# Redesigning Health Care for Complex Patients

**California  
Telehealth  
Network**

*An OCHIN organization*

## What We're Learning

**Clinical Complexity**

*Patient Level*

**Social Complexity**

*Community Level*

**Patient Outcomes**

OCHIN members' patients living in communities with the highest social deprivation are **24% more likely** to have poor diabetes control.

## How We're Improving Access to Care

**Broadband Network Services and  
Telehealth Program Adoption  
Support (CTN and CTRC)**

**eConsult and Telehealth Tools**

**Adoption of Virtual Care Solutions**

**Patient Engagement Solutions  
including Interpreter Services**

**Social Service Resource Locators**

# Our Work in California

*An OCHIN organization*

## 133 Total Organizations\*

- Broadband: 88 (177 locations)
- Epic: 33 ( 31 CA FQHCs on OCHIN Epic)
- NextGen: 5
- HCCN: 36
- Research Partners: 2

*\*Some customers have more than one product*

## Special California Program Needs

- Alternative Payment Models
- CA Telehealth Resource Center
- CAIRS2
- CHDP
- CPSP
- Every Woman Counts
- FamilyPACT
- HCCN HRSA Network Grant
- Medi-Cal
- OSHPD
- 340B

**3M** annual visits

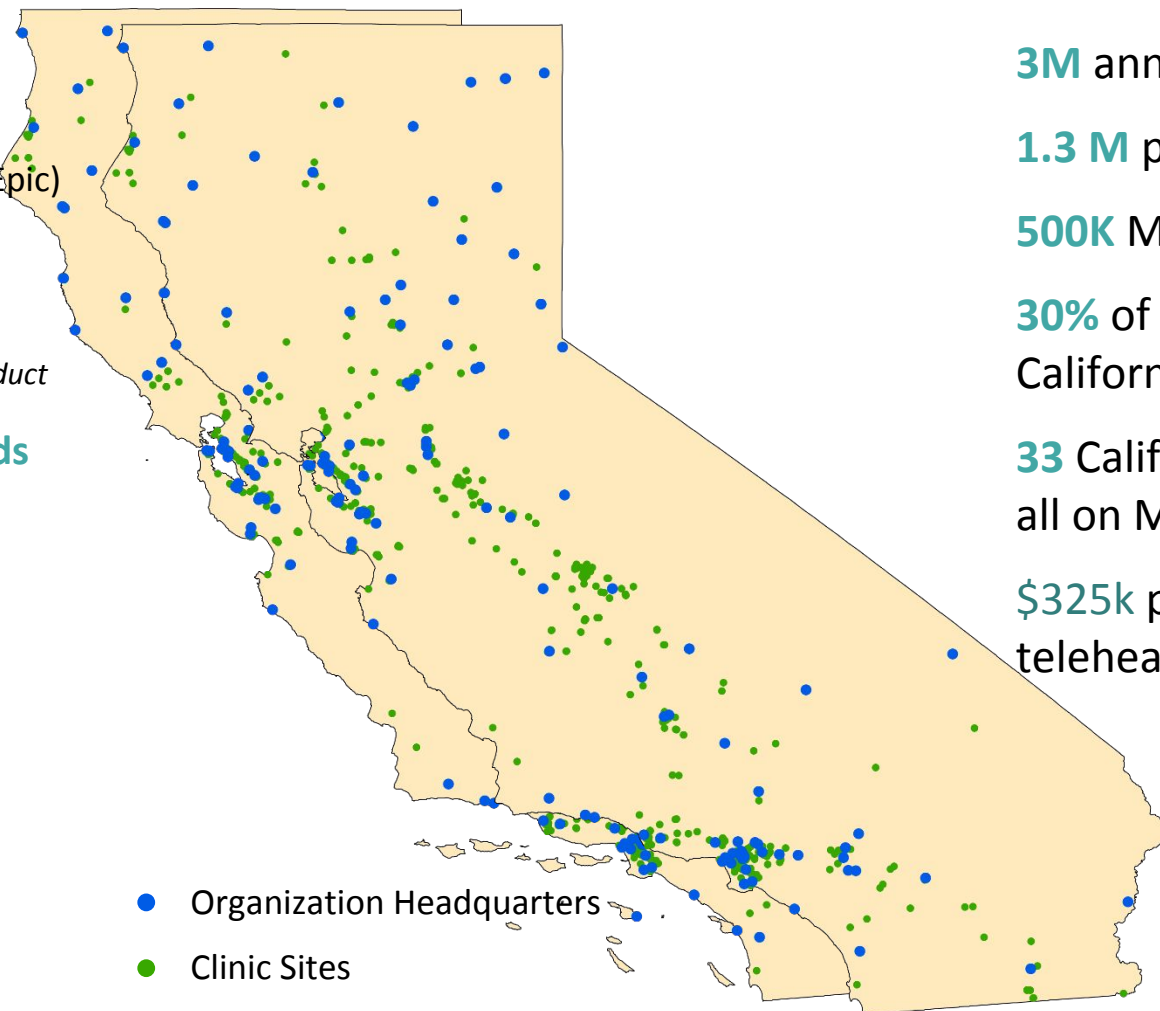

**1.3 M** patients

**500K** Medi-Cal patients

**30%** of OCHIN EHR visits are in California, more than any other state

**33** California groups on OCHIN Epic, all on Managed Medi-Cal

**\$325k** per year CTRC support for telehealth adoption

# Broadband Investments in California

FCC Subsidy Obtained for the 2020 Funding Year:

**\$1,650,567** (Net 2020 Funding Year)

**56% Rural Members**

**177 Member Locations:**

**157 Clinics**

**20 Hospitals**

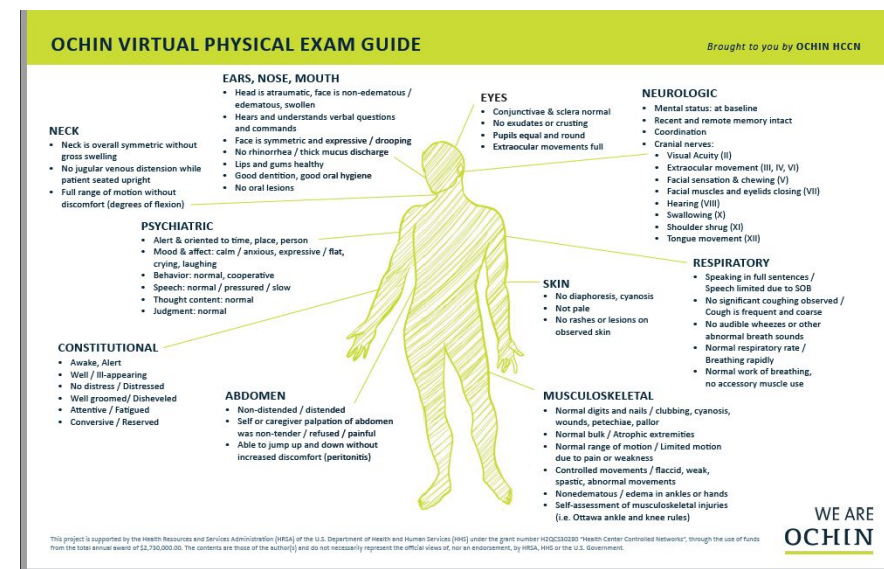

# EMR Agnostic Technical Training and Support

An OCHIN organization

Through our Health Center Controlled Network we're learning more about gaps in:

- Provider support for new 'webside manner' needs including specific workflows and technical training/IT support
- Continued support for broadband access
- Patient Engagement: *technology out of the box*
  - Isn't culturally competent
  - limited language access
  - requires high technology literacy-need "help" line support

# FCC Telehealth Funding Awards

*An OCHIN organization*

We received 41 applications totaling more than \$12.9 million in requests from members of the two OCHIN-run consortia: OCHIN Broad Network Services (OBNS) and the California Telehealth Network (CTN). *(NOTE: One organization alone in California requested \$4.2m in critically needed hardware and devices to support virtual care in the pandemic)*

With only \$2 million awarded to us from the FCC, we managed a highly competitive process based on the criteria set out in the application.

## **We awarded 24 health care organizations:**

- 11 from CTN (CA) for \$1M
- 13 from OBNS (22 states) for \$1M

## **Packages included:**

- 220 Virtual Clinic-At-Home
- 679 Hypertension Management
- 356 Diabetes Management
- 445 Device & Service

# For California Members, Percentage of Gross Charges for Behavioral Health and Primary Care Services Increase, While Charges for Dental Service Decrease During COVID-19

Percentage of Total Gross Charges (California Members), by Month

# Telehealth Encounters in California Remain Steady in Response to COVID-19

**California  
Telehealth  
Network**

*An OCHIN organization*

# What We've Learned So Far:

**California  
Telehealth  
Network**

*An OCHIN organization*

The appetite for virtual care has **increased with the advent of COVID-19** and corresponding changes to reimbursement rules.

While adoption has dramatically increased in 2020,  
several barriers pose a challenge to adoption:

**Ease of Use**

**Reimbursement**

**Access to  
Technology**

**Comfort level  
with Technology**

**Support for  
Additional  
Languages**

# Virtual Care Advocacy in California

CTN/ OCHIN is partnering across the state to advocate for stability in virtual care payment and support for health centers.

## Efforts In Sacramento include:

- Supporting the ability for providers to establish new patients via telehealth beyond the end of the public health emergency
- Continuing virtual care payment and flexibility options in preparation for future disasters or outbreaks
- Advocating for FQHC/RHC to continue to be both originating and distant sites to provide virtual patient care
- Supporting Medi-Cal payment for asynchronous care such as eVisits and eConsults
- Continued support for expanding funds and access for broadband and helping close equity gaps around telehealth

# Key Actions to Support Virtual Care Adoption : **Call for Working Together**

**California  
Telehealth  
Network**

*An OCHIN organization*

1

Build certainty in sustained telehealth reimbursement

2

Continue broadband investments to reduce the digital divide

3

Support provider training, patient engagement and patient portals

4

Support for Patients using these tools

# California Telehealth Policy Update

October 22, 2020

Mei Wa Kwong, JD,  
*Executive Director, CCHP*

## CENTER FOR CONNECTED HEALTH POLICY (CCHP)

is a non-profit, non-partisan organization that seeks to advance state and national telehealth policy to promote improvements in health systems and greater health equity.

# DISCLAIMERS

- Any information provided in today's talk is not to be regarded as legal advice. Today's talk is purely for informational purposes.
- Always consult with legal counsel.
- CCHP has no relevant financial interest, arrangement, or affiliation with any organizations related to commercial products or services discussed in this program.

# ABOUT CCHP

- Established in 2009
- Program under the Public Health Institute
- Became federally designated national telehealth policy resource center in 2012 through a grant from HRSA
- Work with a variety of funders and partners on the state and federal levels
- Administrator National Consortium of Telehealth Resource Centers
- Convener for California Telehealth Policy Coalition

# TELEHEALTH STATE-BY-STATE POLICIES, LAWS & REGULATIONS

The screenshot displays the Center for Connected Health Policy website. The header includes navigation links for 'CURRENT STATE LAWS & POLICIES' and 'LEGISLATION & REGULATION TRACKING'. Below the header, there's a navigation bar with 'ABOUT', 'TELEHEALTH POLICY', 'RESOURCES', and 'CONTACT'. A search bar is also present. The main content area features a map of the United States with an orange callout bubble labeled 'Interactive Policy Map'. To the left of the map, there's a section titled 'Current State Laws & Reimbursement Policies' with search filters for 'All 50 States & D.C.', 'All Categories', and 'All Topics'. A legend at the bottom indicates that orange states have policies that exist or are explicitly allowed, while grey states do not. A note at the bottom states that the key is applicable only to topics indicated with an asterisk in the drop-down menu.

# TELEHEALTH POLICY CHANGES IN COVID-19

## FEDERAL

MEDICARE ISSUE	CHANGE
Geographic Limit	Waived
Site limitation	Waived
Provider List	Expanded
Services Eligible	Added additional 80 codes
Visit limits	Waived certain limits
Modality	Live Video, Phone, some srvs
Supervision requirements	Relaxed some
Licensing	Relaxed requirements
Tech-Enabled/Comm-Based (not considered telehealth, but uses telehealth technology)	More codes eligible for phone & allowed PTs/OTs/SLPs & other use

- DEA – PHE prescribing exception/allowed phone for suboxone for OUD
- HIPAA – OCR will not fine during this time

## STATE (Most Common Changes)

MEDICAID ISSUE	CHANGE
Modality	Allowing phone
Location	Allowing home
Consent	Relaxed consent requirements
Services	Expanded types of services eligible
Providers	Allowed other providers such as allied health pros
Licensing	Waived some requirements

- Private payer orders range from encouragement to cover telehealth to more explicit mandates
- Relaxed some health information protections

# IMPACT OF TELEHEALTH POLICY CHANGES

Figure 1. Primary Care Visits for FFS Medicare Beneficiaries (visits in millions per week)

Source: Medicare claims data up to June 3rd, available as of June 16.

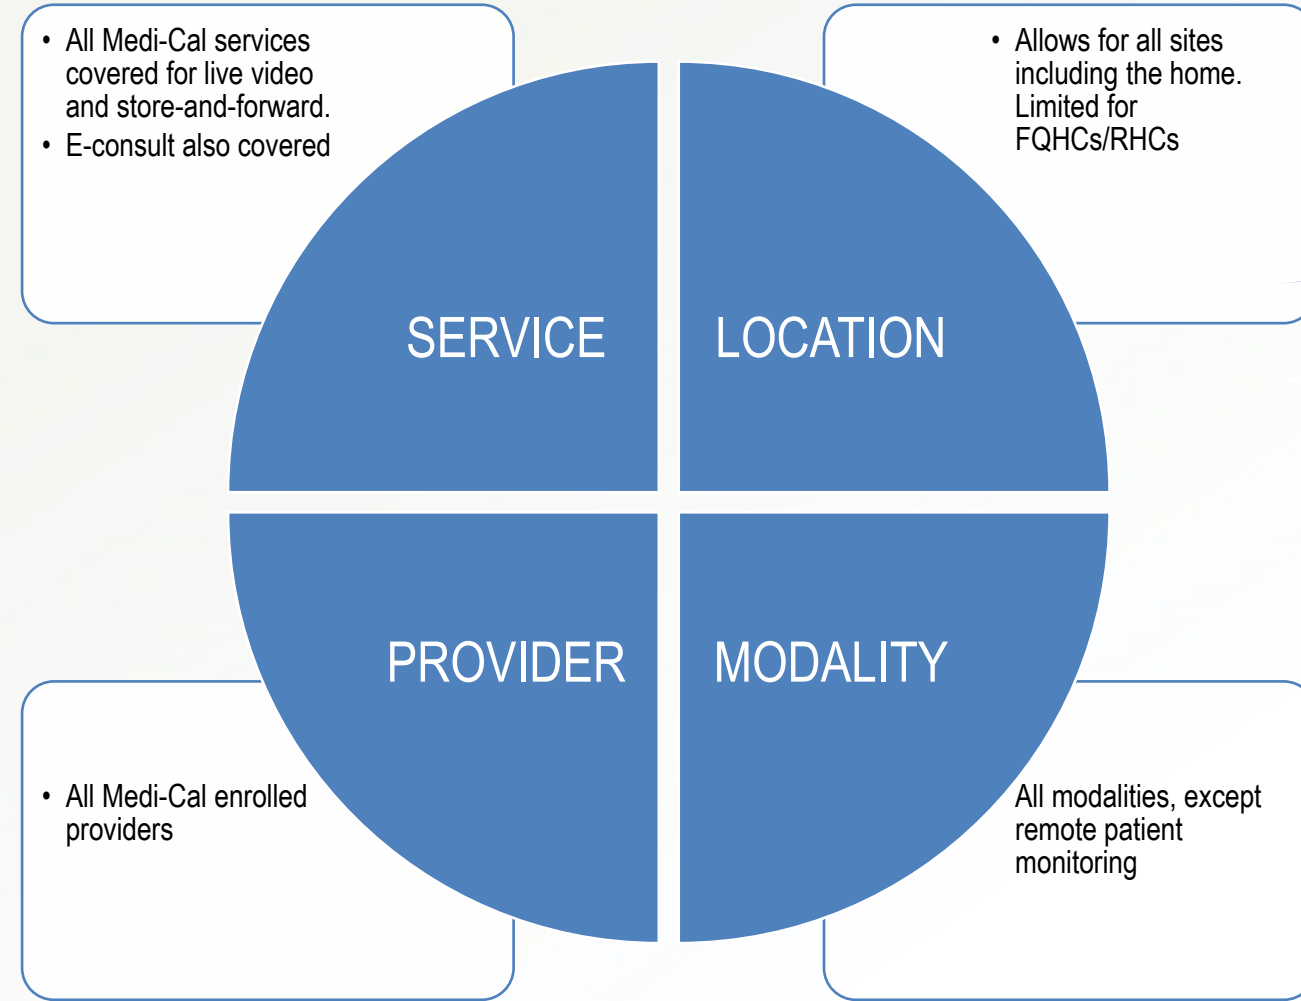

- Chart from ASPE Issue Brief, July 28, 2020 “Medicare Beneficiary Use of Telehealth Visits: Early Data from the Start of the COVID-19 Pandemic”

[https://aspe.hhs.gov/system/files/pdf/263866/HP\\_IssueBrief\\_MedicareTelehealth\\_final7.29.20.pdf](https://aspe.hhs.gov/system/files/pdf/263866/HP_IssueBrief_MedicareTelehealth_final7.29.20.pdf)

# CALIFORNIA POLICY PRE-COVID-19

- **Medi-Cal Policies, Update Summer 2019**
  - All covered services can be provided by live video or store-and-forward, at the provider's discretion
  - Home is an eligible originating site
  - Certain limitations for FQHCs and RHCs
- Oral or written consent to use telehealth permitted
- **Commercial Plans:** AB 744 (2019) requires payment parity for commercial health plans and insurers, for all contracts executed or amended on or after January 1, 2021

# CALIFORNIA POLICY CHANGES DURING COVID-19

Key temporary California policy changes during COVID-19:

- Medi-Cal and commercial plans are required to reimburse for **services provided by telephone**
- In Medi-Cal, **FQHCs/RHCs have expanded ability to recoup reimbursement for telehealth**
- Governor relaxed **consent and privacy requirements**
- Commercial health plans are required to **cover telehealth, at payment parity**
- Many temporary **changes tied to federal public health emergency (PHE)**

ISSUE	MEDI-CAL	COMMERCIAL HEALTH PLANS
<b>Geographic Limitation</b>	N/A – Did not have limitation pre-COVID-19	N/A – Did not have limitation pre-COVID-19
<b>Site Limitation</b>	Waived restrictions for FQHCs/RHCs	N/A – Did not have limitation pre-COVID-19
<b>Provider Limitation</b>	Allowed greater flexibilities to providers at FQHCs/RHCs	DMHC requested plans not limit provider types eligible for reimbursement
<b>Services Eligible</b>	DHCS required Medi-Cal Managed Care Plans to cover telehealth services to the same extent as in-person equivalents	DMHC required health plans to cover telehealth services to the same extent as in-person equivalents
<b>Payment Parity</b>	DHCS required Medi-Cal Managed Care Plans to cover telehealth services at same rate as in-person equivalents	DMHC required health plans to cover telehealth services at same rate as in-person equivalent
<b>Billing Frequency Limitations</b>	N/A	N/A
<b>Modality</b>	Expanded coverage to include phone as a modality to deliver services	Expanded coverage to include phone as a modality to deliver services
<b>Licensing</b>	Limited exceptions for certain facilities that apply for a waiver through the California Emergency Services Agency	Limited exceptions for certain facilities that apply for a waiver through the California Emergency Services Agency

# TELEHEALTH & MEDICAID

## Preliminary data suggest that services delivered via telehealth increased from February through April 2020

Chart & Information from CMS Preliminary Medicaid & CHIP Data Snapshot for Services through June 30, 2020.

<https://www.medicaid.gov/resources-for-states/downloads/medicaid-chip-beneficiaries-COVID-19-snapshot-data-through-20200630.pdf>

# TELEHEALTH & MEDICAID

**Preliminary data suggest that services delivered via telehealth were highest among working age adults, followed by children and older adults**

Services delivered via telehealth per 1,000 beneficiaries in 2020

**Note:** Data for recent months are likely to be adjusted upward due to claims lag; see slides 5 and 11 for additional details on claims lag.

**Note:** Many beneficiaries age 65 and older are likely to be dually eligible for both Medicare and Medicaid. Therefore, the results may underestimate telehealth utilization in this population.

*Chart & Information from CMS Preliminary Medicaid & CHIP Data Snapshot for Services through June 30, 2020.*

<https://www.medicaid.gov/resources-for-states/downloads/medicaid-chip-beneficiaries-COVID-19-snapshot-data-through-20200630.pdf>

# TELEHEALTH & MEDICAID

Preliminary data suggest that, among children, services delivered via telehealth per 1,000 beneficiary months from March through June 2020 varied across states

# of services delivered via telehealth per 1,000 beneficiary months (age 18 and under), March – June 2020

Telehealth rates among children peaked in April for nearly all states and began to fall in May.

Across states in April 2020, Maine had the highest monthly rate at 402 services per 1,000 child beneficiaries, and Vermont had the lowest monthly rate at 23 services per 1,000 child beneficiaries.

**Note:** Data for recent months are likely to be adjusted upward due to claims lag; see slides 5 and 11 for additional details on claims lag.

Preliminary data suggest that, among adults age 19 to 64, services delivered via telehealth per 1,000 beneficiary months from March through June 2020 varied across states

# of services delivered via telehealth per 1,000 beneficiary months (age 19 to 64), March – June 2020

Telehealth rates among working age adults peaked in April for nearly all states and began to fall in May.

Across states in April 2020, Missouri had the highest monthly rate at 520 services per 1,000 beneficiaries age 19 to 64, and South Carolina had the lowest monthly rate at 51 services per 1,000 beneficiaries age 19 to 64.

**Note:** Data for recent months are likely to be adjusted upward due to claims lag; see slides 5 and 11 for additional details on claims lag.

Preliminary data suggest that services delivered via telehealth (paid by Medicaid) per 1,000 beneficiary months from March through June 2020 was lowest among beneficiaries age 65+ across most states

# of services delivered via telehealth per 1,000 beneficiary months (age 65+), March – June 2020

Telehealth rates among adults age 65+ also peaked in April for nearly all states and began to fall in May.

ss states in April 2020, Maryland had highest monthly rate at 363 services per ) beneficiaries, and South Carolina had west monthly rate at 23 services per ) beneficiaries.

: Data for recent months are likely to be sted upward due to claims lag; see slides 5 !1 for additional details on claims lag. : Many beneficiaries age 65 and older are to be dually eligible for both Medicare Medicaid. Therefore, the results may restimate telehealth utilization in this lation.

Chart & Information from CMS Preliminary Medicaid & CHIP Data Snapshot for Services through June 30, 2020.

# CHC TELEHEALTH UTILIZATION

## Health Center Virtual Visits

In a survey conducted by the Health Resources and Services Administration (HRSA) of CHCs, an average of 27.13% of the health center visits were conducted virtually (either telephone or a telehealth modality) for the week of October 2, 2020.

Health Resources & Services Administration, COVID-19 health Center Survey Maps.

<https://bphc.hrsa.gov/emergency-response/coronavirus-health-center-data/survey-maps#virtual> (Accessed October 18, 2020).

# OTHER ISSUES

- Beyond reimbursement/coverage
  - Broadband
  - Licensing
  - Education of providers and consumers
  - Out-of-date forms, regulations

# CALIFORNIA POLICY DURING COVID-19

- Where do we stand now?
  - Still only have temporary changes, nothing made permanent yet
  - No significant telehealth legislation was signed this past session
  - In Governor Newsom's veto message, DHCS "is currently in the process of evaluating its global telehealth policy to determine what temporary flexibilities should be extended beyond the COVID-19 pandemic."

# CA TELEHEALTH POLICY COALITION

- Established in 2011
- A project of CCHP
- 100 State & National Organizations as members
- Wide variety of state organizations participate
- Valued resource of educational materials
- Informational webinars and legislative briefings

# COALITION RECOMMENDATIONS FOR 2021

## **For California, necessary policy changes for 2021 include:**

- Continue to require payment for the use of telephone to deliver services, including for FQHCs and RHCs.
- Continue to allow FQHCs and RHCs to provide services to their patients in the home.
- Expand payment parity for telehealth-delivered services to Medi-Cal Managed Care.
- Require reimbursement of remote patient monitoring and e-consult in Medi-Cal, including for FQHCs and RHCs.
- Allow FQHCs and RHCs to establish a patient-provider relationship via telehealth.
- Create more provider education materials on how to bill for telehealth.
- Generate more patient education on the availability of telehealth and how to access it.
- Update outdated forms that don't allow billing for telehealth.

California has the opportunity to learn from COVID-19 so that when our next major emergency occurs, the state and its providers are prepared to use telehealth to meet Californians' needs.

# Specialty Network Telehealth Adoption

Visit Count By Week for Vendor: Non CHCN, Clinic: All, Specialty: All

Date Updated: 10/19/2020 4:50:50 AM

# Technology and Practices

- Multiple modalities
- Audio only
  - Doximity dialer
  - Clinic-purchased i-phones
- Video
  - Doximity dialer
  - Zoom via OCHIN EPIC My Chart
  - Face-time via clinic-purchased i-phones

# Use of Telehealth

- Primary care visit numbers are only slightly lower than prior to Shelter-in-Place
- In September, 61% of visits were via telehealth
- In a study done by LifeLong Medical Care, 81% of respondents were satisfied with telehealth, and 40% of those were over 65 years old
- Much reduced no-shows for primary care and behavioral health

# Barriers

- Comfort with technology
- Access to stable Wi-fi
- Access to devices
- Non-English speakers
  - Challenges with 3-way calls for translation in both video and audio visits
- Lack of privacy in the home
  - May make behavioral health and inter-personal violence harder to approach

# Key Action Steps

- Optimize connected devices – BP control is a glaring example of need
- Make FaceTime HIPAA compliant
- Integrate devices in to the EHR
- Simplify access to Zoom for MyChart
- Continue to reimburse visits in the FQHC setting
- Erase the digital divide

## Key Action Steps regards Structural Barriers

- Telehealth can reduce disparities in access by minimizing the economic burden of taking time off work
- Transportation is a structural barrier that is mitigated by use of telehealth

All Services - Daily Visits by Type - Daily Average of Weekday Visits

\*\*Included encounters have an end of day appointment status of arrived or completed or are posted in billing. Un-appointed encounters are excluded until posted in billing, so there is a lag.

\*\*Reference lines display the average weekday visit counts for the respective month.

\*\*Telehealth includes encounters that have either a Telehealth appointment type, encounter type or program code attached.

\*\*Telehealth Video & Phone are distinguished using the appointment type and/or the encounter reason codes. Telehealth encounters without these reason codes are included as Telehealth Unspecified.

# Video Care Values Statement

Open Door Community Health Centers removes barriers, improves access, and creates lasting and transformative change to the way we provide healthcare by equipping patients and staff with what they need for a high quality video visit experience.

## All Service Lines - Daily Visits by Type

\*\*Included encounters have an end of day appointment status of arrived or completed or are posted in billing. Un-appointed encounters are excluded until posted in billing, so there is a lag.

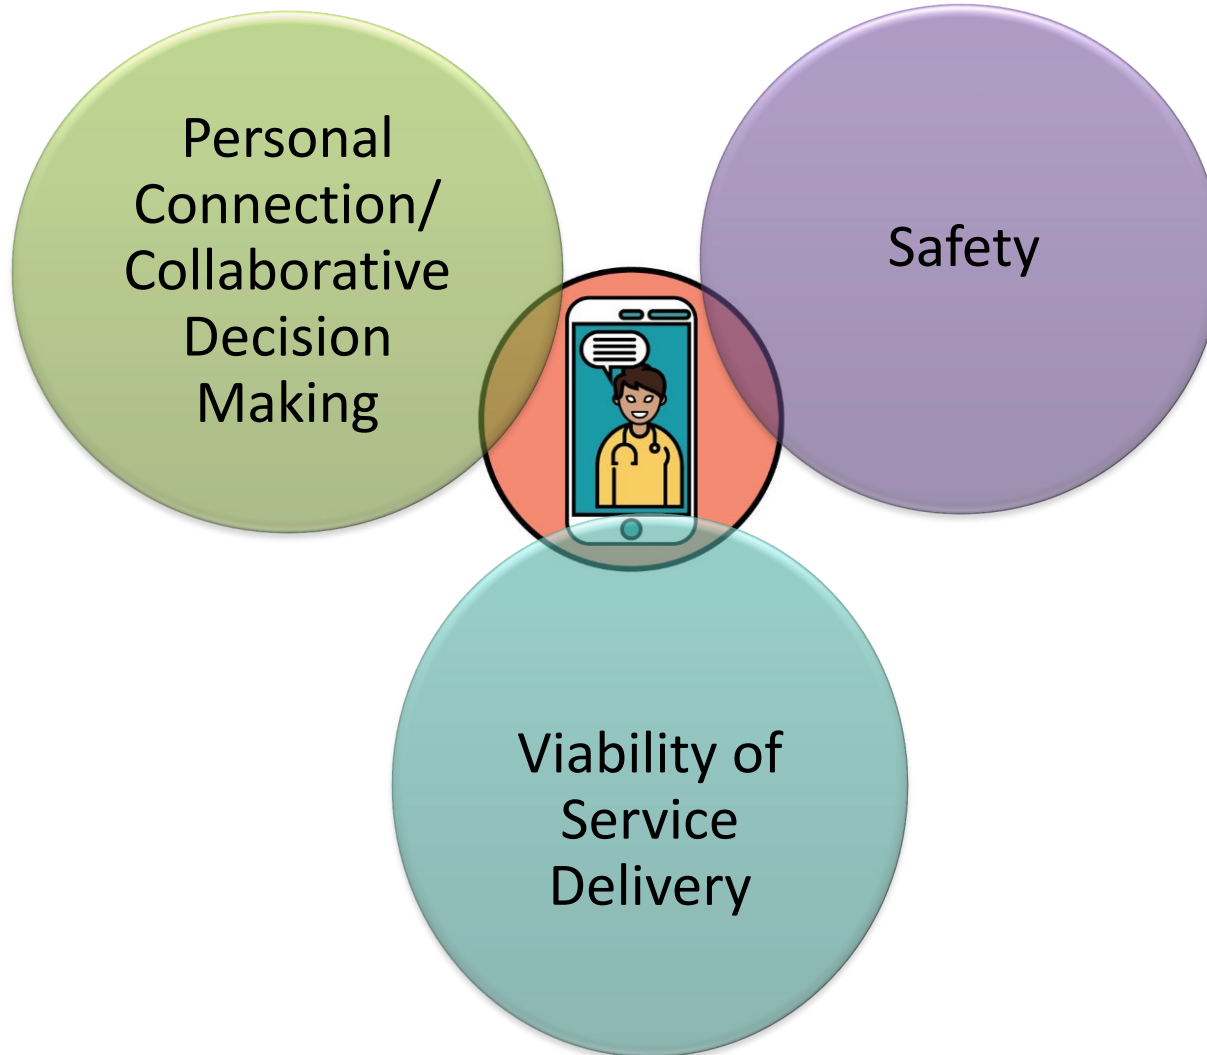

\*\*Telehealth includes encounters that have either a Telehealth appointment type, encounter type or program code attached.

\*\*Telehealth Video & Phone are distinguished using the appointment type and/or the encounter reason codes. Telehealth encounters without these reason codes are included as Telehealth Unspecified.

\*\* Percentages in gray outside of colored bars display daily total visits as percentage of prior year moving average weekday visits.

**Goal:** By October 31<sup>st</sup>, **50%** of all *virtual* medical visits will be done by video.

Video Care Workflows

Patient Resources

### Family Practice Virtual Visit Types

**Primary Care Virtual Visit [878]** – Any Video or Telephone Visit where the Staff can send a Zoom, DOXY, or other Platform invite for a virtual visit. This is for visits that would normally be scheduled in a Family Practice department, including Case Management, Latino Health Coordinators, Nursing, or other Non-Billable visits.

**MyChart Virtual Visit [733]** – Any Video Visit where the patient has an active MyChart account and can self check-in and launch the Video Visit from MyChart. This is for visits that would normally be scheduled in a Family Practice department, including Case Management, Latino Health Coordinators, Nursing, or other Non-Billable visits.

**MyChart Group Virtual Visit [733]** – Any Video Visit where the patient has an active MyChart account and can self check-in and launch the Video Visit from MyChart. This is for visits that would normally be scheduled in a Family Practice department, including Case Management, Latino Health Coordinators, Nursing, or other Non-Billable visits.

**Virtual Visit After Hours [733]** – Any Video Visit where the patient has an active MyChart account and can self check-in and launch the Video Visit from MyChart. This is for visits that would normally be scheduled in a Family Practice department, including Case Management, Latino Health Coordinators, Nursing, or other Non-Billable visits.

### Behavioral Health Virtual Visit Types

**BH Virtual [877]** – Any Video or Telephone Visits where the staff can send a Zoom, DOXY, or other Platform for a virtual visit. This visit type is to be used in the Mental Health Departments only for behavioral health providers.

**MyChart BH/MH Virtual Visit [942]** – Any Video Visit where the Patient has an active MyChart account and can self-check-in and launch the Video Visit from MyChart. This visit type is to be used in the Mental Health Departments only for behavioral health providers.

**MyChart BH/MH Grp Virtual Visit [951]** – Any created Virtual Group meeting that has many participants and a facilitator or two that is part of the Mental Health Departments. Patients can self-check-in and launch Zoom or a facilitator can send a Zoom invite via text or email.

### Dental Virtual Visit Types

**Dental Virtual Visit [1021]** – Any Video or Telephone Visits where the staff can send a Zoom, DOXY, or other platform invite for a virtual visit. This visit type is only for the Dental Department.

**MyChart Dental Virtual Visit [937]** – Any Video Visit where the patient has an active MyChart account and can self-check-in and launch the Video Visit from MyChart. This visit type is only to be used in the Dental Department for behavioral health providers.

### Telemedicine Visit Types

**Telemedicine (TM) [121]** – Any visit where a patient comes into the clinic for an appointment and a staff member connects the patient to another provider or specialist via Zoom, DOXY, or other video

**Virtual Visits [946]** – Not currently being used

# Patient Resource Development

Video Care at Open Door Community Health Centers

## Glossary of Terms

### Video Care for Patients

**Video Care** is how Open Door Community Health Centers refers to care delivered using a video conferencing platform like MyChart Zoom. **Video Care** is available for primary, dental, behavioral, non-billable, and specialty visits.

### Other Common Terms

There are many other terms used to describe care delivered remotely (not in person), including:

- Telehealth – refers broadly to all electronic and phone services used to provide care at a distance. It can include communication between patient and provider, or consultation between providers.
- Remote Patient Monitoring – when patient data is collected and sent electronically to a provider (think blood pressure results).
- Mobile Health – when patient data is collected using a mobile wearable device or smartphone app and sent electronically to a provider.

**Video Care at Open Door** Home // Services // Video Care at Open Door

Telehealth is a way for Open Door patients to see their providers and medical specialists when they cannot do an in-person visit.

Open Door is using telehealth to deliver medical, behavioral health, and dental services during the COVID-19 pandemic. Telehealth is a way for Open Door patients to see their care teams when they cannot do an in-person visit.

For several years now, Open Door has worked with medical specialists outside our region to provide their expertise to patients.

# Patient Video Support

## During Phase 1 Telemedicine & EMR teams helped track data:

Ave time helping a patient onboard to video care:

- 5-10 min for patients with medium confidence with technology
- 20+ min for patients with low confidence with technology

OPEN DOOR Community Health Centers, Inc.

### Patient Video Support Specialist Job Description

<b>Job Title:</b>	Patient Video Support Specialist
<b>Department:</b>	EMR Ops
<b>Reports To:</b>	Service Area Administrator
<b>FLSA Status:</b>	Non-Exempt/Hourly, Full-Time; Benefitted
<b>Prepared By:</b>	Mia Houlberg/Breezy Mueller/Brea Olmstead/Jacob Kamplain/Kathleen Moreno
<b>Approved By:</b>	
<b>Revised Date:</b>	September 2020

#### SUMMARY:

Under the direct supervision of the Service Area Administrator, the Patients Video Support Specialist assists Open Door patients and care teams with video connection assistance and navigation for medical, dental and behavioral health visits. This position, in accordance with Open Door's policies and procedures is responsible for providing assistance on a scheduled and ad hoc basis during operating hours, and in support of patient's video connectivity two days in advance of scheduled appointments, with a focus on providing quality, timely, patient centric, cost-effective patient video support. The Patients Video Support Specialist works as part of the integrated EMR Operations team and collaboratively with care teams, providers, patients, Member Services and other staff while maintaining a supportive, caring, knowledgeable, and efficient manner. This position contributes the development, implementation, and success of Video Care operational goals and patient outcomes.

## Next Steps:

- Build capacity at all levels to support patients with video support.
- Build capacity within the EMR Team for enhanced patient & staff video care support.

# Staff Training

Training Name	Learning Objectives	Target Audience	Length of Training	Resources Needed	Trainers
<b>Problem Solving/ Troubleshooting</b>	How to get patients connected to different platforms & workflow overview.	Front office/ Back Office	~1 hr./ lunch	Zoom, computers	Jessica Clower primary Training Team back up
<b>Workflow Training</b>	Step-by-step training of the EMR video visit workflow.	Front office/ Back Office	~1 hr./ lunch	Zoom, computers, EMR prep	Training team primary Breezy back up
<b>Video Visit Best Practices</b>	Customer care training to help staff feel confident in their video care role.	Front office/ Back Office	~1 hr./ lunch	Zoom, computers	Resolution Care
<b>Provider Resolution Care Training</b>	Basic etiquette and best practices for providers regarding Video Visits. CME attached.	All providers	~1 hr./ lunch	Zoom, computers	Dr.Fratkin Resolution Care
<b>Provider Workflow Training</b>	Step-by-step detailed training and troubleshooting EMR for video visits.	Providers with low % of video visits.	~1 hr./ lunch	Zoom, computers, EMR prep	Alisa Panel of experienced providers-TBD

# Which Providers are Struggling?

Telehealth Encounter Proportions by Department and Provider

# Telemedicine in Long-Term Care: What has COVID-19 taught us?

Karl Steinberg, MD, CMD, HMDC, HEC-C

President-Elect, AMDA

Past President, CALTCM

Email: [karlsteinberg@MAIL.com](mailto:karlsteinberg@MAIL.com) Twitter: @karlsteinberg

# Telemedicine in SNFs

- Historically, strict criteria had to be met for telemedicine visits to be covered
  - Limited to one visit every 30 days
  - Defeats the purpose of medical necessity, or follow-up after a change of condition
- Federal waivers during the pandemic have greatly relaxed the ability to perform (and bill for) virtual visits, and HIPAA
- Proposed rule indicates one telehealth visit in NF/SNF once every three days
  - Multiple professional societies requesting no specific limit, just medical necessity
- Avoiding unnecessary ED visits and hospitalization/rehospitalization is a key goal

# Telemedicine in SNFs

- Telemedicine, virtual visits, can be very effective
  - For providing medical care and advance care planning
  - Ability to loop in family members who may be in a remote location, great for family meetings
- Some of the waivers may be made permanent
  - Initial comprehensive visits allowed by telemedicine
  - Advanced practice practitioners doing initial comprehensive visits
  - Concern about possible abuse/overuse of these visits, where clearly they are not the same as an in-person visit
- These visits do require staff time. That must be calculated into any programs.
- Who should be on the provider side?
  - “Talk 9” proposed an ED physician remotely, with an EMT onsite
  - Experienced geriatricians/post-acute and long-term care clinicians might be a better option, with a nursing home nurse onsite

# Telemedicine in Assisted Living

- There are lots of medically ill and complex patients residing in AL
- It's increasingly difficult for the industry to cling to the “we're not medical” mantra
- There is a need for medical supervision in these settings
  - **Telemedicine** can fulfill at least some of this need
  - Unnecessary emergency department utilization would be appreciated by all – Title 22 makes it difficult to avoid without a medical evaluation
  - How does a six-bed get medical supervision? Who pays for it?
  - Inappropriate use of hospice occurs, reasons multifactorial—how can AL residents get palliative care when they are either philosophically or prognostically not eligible for hospice? Telemedicine!

# What Have We Learned in Hospice & Palliative Care?

- Virtual visits can be surprisingly effective – including family conferences
- In the pandemic, patients can crash too fast for hospice to get adequately involved
- Continued workforce shortage of specialty palliative care
- Telehealth solutions can improve efficacy for specialists—especially in community private home settings and in small residential homes

# Thank You

# **TELEHEALTH FACT- FINDING LISTENING CONFERENCE**

Paula Hertel, MSW

Senior Living Consult – Lead Consultant

California Assisted Living Association (CALA) Board Member;  
Co-Chair of the Education Committee

## QUICK OVERVIEW OF CALIFORNIA ASSISTED LIVING

Licensed Residential Care Facilities for the Elderly (RCFEs) include a diverse group of communities and operators with a wide range of approaches, amenities and care options.

There are 7,361 RCFEs in California

- 6,123 of these RCFEs have six or fewer beds
- CALA has 671 provider members with over 85,000 licensed capacity
  - 620 – Assisted Living and Memory Care
  - 51- CCRCs

# RESIDENT PROFILE

# OBSERVATION OF USE OF TELEHEALTH IN CALIFORNIA

We do not have comprehensive data on how many communities are using telehealth in California.

- The COVID-19 pandemic has necessitated Telehealth in many communities and for many clinicians. (The reimbursement changes helped drive this shift)
- We do see an uptick in larger communities utilizing sensors and technology analytics to help identify early warning signs (e.g. changes in sleep, mobility, continence, falls, elopements)

# EMERGING USES

## Emerging Uses

- Telehealth Tablets and Robot QI in COVID-19 Isolation Units
- Remote Assessments and Screening
- Care Coordination Applications
- Lighthouse for Older Adults Project
- Telehealth Start-ups and Collaboration

## Areas for Further Exploration

1. **Assessments** - Offsite remote assessment, especially with new residents and residents returning from higher levels of care

2. **Emergency /Specialty Intervention** - Need for clinical interventions relating to high risk negative outcomes – falls, negative/harmful behaviors, medications. Emergency Room visits are often traumatic to residents.

3. **Primary Care Oversight for Memory Care Residents** – medical appointments for residents living in memory care can be difficult to coordinate

4. **Chronic Physical and Mental Health Needs-** Easier access for residents with high acuity physical and cognitive needs, support complex care coordination.

# BARRIERS AND OPPORTUNITIES

## Barriers

- Risk and Regulatory Restraints (e.g. 87465)
- Different Payer Platforms and Internal Processes
- RCFE Staffing Resources and Training
- Connectivity in the Residential Community (access and costs)
- Confidentiality and Privacy Protocols
- Older Adult Adoption of Telemedicine
- How to Address Multi-System Chronic and Acute Symptoms

## Opportunities to Solve Challenges

- Address Ongoing COVID-19 Issues
- Increased Access to Geriatricians and Specialist Care
- Immediate/Timely Access to Health Care Services and Interventions
- Better Assessment and Onsite Interventions for Poor Reporters, Especially Residents with Dementia
- Ongoing Monitoring of Physical and Cognitive Changes in Condition
- Increased Involvement and Care Coordination among Resident, Family and Clinical Team
- Collaboration with ALW and Managed Care
- Utilize Professionals' Full Scope of Practice

JOINT LEGISLATIVE COMMITTEE ON  
EMERGENCY MANAGEMENT

Since she was elected, Assemblymember Aguiar-Curry has authored and supported several ground-breaking policies to expand the access and use of telehealth technology and improve the health outcomes of millions of Californians. These policies include: AB 744 which creates telehealth parity by requiring that a health plan or insurer must reimburse a healthcare provider for services delivered to an enrollee through telehealth, if those same services are covered when in-person. In addition to AB 1494 that ensures during a declared state of emergency our community clinics can be reimbursed for telehealth provided to Medi-Cal patients in the aftermath of a disaster, and AB 401, which she authored in her first year as a legislator, authorizing the first-ever use of telepharmacy technology in medically underserved areas of California, where there is no pharmacist within ten miles or more.

This year, Aguiar-Curry worked to expand telehealth services eligible for equal reimbursement to in-person health services and to make permanent the telehealth services subject to federal waivers. When those federal waivers expire as the pandemic winds down, Assemblymember Aguiar-Curry noted that we must be prepared with State law to continue telehealth parity.

Equity in the use of telemedicine requires critical investments in our state's broadband infrastructure, particularly in our hardest to reach areas, that have been left behind for too long. This year, in partnership with the California Emerging Technology Fund and our widespread coalition of support, the Assemblymember authored AB 570 that would have provided the necessary funding and safeguards for our most vulnerable communities, critical to fully realizing the innovative capacity of telemedicine.

This upcoming session, Assemblymember Aguiar-Curry in partnership with CETF is reintroducing broadband legislation that will provide the necessary funding and bonding capacity to pave the way for statewide investment in future-proof infrastructure and high-speed internet access for all. Together, we can expand broadband access in our most unserved, high-poverty communities, equip small businesses with the connectivity they need to survive, and truly achieve Internet For All.
